

The AAV Operating System

Architecting the
Antahkarana Audience
Verdict Framework
(Version 1.0)

Scaling authenticity through
ISO-grade operational design.

Shifting the Promotional Paradigm

		Traditional Promotions	The AAV System
	The Decision Maker	Studio & PR Teams	The Audience
	The Feedback Loop	Scripted & Curated	Uncensored & Authentic
	The Execution Engine	Founder-Led & Intuition-Based	Process-Led & Handbook-Driven

The goal is to remove the founder bottleneck. AAV must be a system any trained team can execute flawlessly.

The System Architecture at a Glance

A 300-page PMBOK/ISO-level operational manual designed to empower a completely new team to run an AAV campaign independently.

The Cultural Software

Insight: A rigid operational system only works if the cultural software running on it is flawless. The filmmaker must stand by the audience's verdict—accepting both praise and criticism.

The Stakeholder Ecosystem

Every node represents a distinct operational unit. The AAV system aligns over 20 distinct stakeholder groups toward a single **verified verdict**.

Anatomy of an AAV Role

Case Study Profile: The Registration Lead

Core Responsibilities

- Manage registrations, verify attendees, allocate seats, handle cancellations

KPI Metrics

- Registration conversion rates,
- Attendance %, Query Response Time

Required Artifacts

- Registration Sheet
- Unique QR Codes
- Attendance Sheet

Daily Activities Flow

This exact blueprint is replicated across 15+ dedicated roles, from the Campaign Director to the Theatre Coordinator.

The 6-Stage Execution Engine

Stages 1–3: The Hype and Capture Funnel

Stages 4–6: Truth and Transaction

Screening (The Experience)

Strict audience check-in, interval management, and structured exit flow into the interview zones.

Verdict (The Crux)

Deploy voting booths, conduct authentic unscripted interviews, gather statistics, and execute fast-turnaround video editing.

Business (The ROI)

Utilize verified data for Distributor Screenings and OTT Platform buyer presentations.

Key Engine KPI: Verified Audience Sentiment Output
(Positive, Mixed, Negative, Family Recommendation %)

Standard Operating Procedures & Resilience

Hope is not a strategy. Every scenario, from a power failure to social media trolls, has a pre-defined playbook.

The Artifacts Component Library

Brand Assets

Official Logos,
Verdict Stamps,
ID Cards,
Interview Mic Cubes.

Theatre Assets

Welcome Screens,
Feedback Booth Specifications,
Exit Posters,
Audience Guidelines.

Digital Assets

QR Tickets,
Consent Forms,
Landing Pages,
Daily Reporting
Dashboards.

Eliminating blank page syndrome by providing an out-of-the-box library for every physical and digital touchpoint.

The Content Cadence Timeline

The Analytics Command Center

Translating raw emotion into a quantifiable, heavily vetted data set that gives OTT platforms and distributors total confidence in the product.

The Long-Term Ecosystem Roadmap

Insight: AAV is not merely a marketing tactic; it is the foundation for an entirely new, transparent film evaluation ecosystem.

The Ultimate Deliverable

The Proposal:

Commission the 250-300 page professional operations handbook.

The Value Proposition:

A fully documented governance, process, and execution framework that empowers any trained team to run an AAV campaign flawlessly, removing reliance on the founder.

True scale begins when the process is independent of the creator.
It's time to build the system.
